Clamber® Tiered Seating

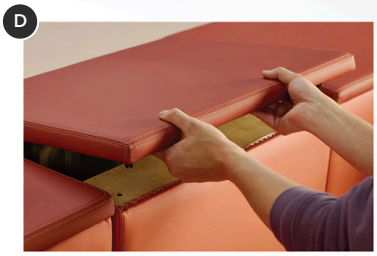

Turn traditional seating rules upside down with Clamber reconfigurable, multi-level modular units. Designed for play, climbing, and collaboration, Clamber brings unmatched versatility with optional integrated walls and worksurfaces, effortlessly transforming any space.

Key Features

A Modular Tiered Seating

Linear and curved multi-level shapes support sitting, standing, or climbing. Laminate tier tops can be used to designate aisleways. Seating ganging kits are available and ordered separately.

B Walls & Worksurfaces

Walls and integrated worksurfaces* offer enhanced capabilities, support, and space division. Worksurface ganging kits and post leg kits are available and ordered separately.
*Must order wall with worksurface mount and worksurface separately.

C Integrated Storage

Expand functionality with integrated open storage and planters* that support organization and enhance well-being. Storage units double as seating and are designed to pair seamlessly with Imaginasium Blips. Select cubbies accommodate standard 3- and 6-inch totes.
*Liner required for use with live plants. Plants and liners purchased separately.

D Sustainable Design

Laminate* and upholstered tier tops are replaceable, allowing for easy design updates and extending the product's lifespan.
*Storage units with laminate tops do not include the top replacement system

E Durability

Built to withstand daily use in high-traffic areas, materials are easy to clean or replace. A 600-pound weight rating ensures maximum durability.

F Material Options

Match or contrast tier tops with a range of high-performance Pallas Textiles, KI Ingrade, or COM upholstery. Select thread color for the double-needle stitching. Laminate tier tops are available in various finish options.

G Integrated Power

Available in four colors, optional power modules include 125V and USB-A+C ports with several location options. Each module has its own 3-prong plug.
