

MyWay Lounge Seating

Featuring a modular, asymmetrical design and multiple arm styles, MyWay lounge chairs allow for a variety of sitting positions and seating configurations.

Key Features

A Adaptive Comfort

Designed to accommodate any sitting style, all horizontal surfaces are durably designed to be sat on and padded for comfort.

B Arm Styles

Chairs are modular and available in any combination of four arm styles: work arm, high arm, low arm, and no arm in right or left orientations. Use as standalone lounge chair solutions or create dynamic configurations, sofas, and loveseats.

C Base Design

Available with polished aluminum tapered 4-leg or sled base styles, design provides a place to tuck belongings below the seat. Sled base available with optional black nylon glides.

D Design Freedom

Choose from Pallas Textiles, KI Ingrade, or COM upholstery options. Specify as matching or contrasting fabric. Optional moisture barrier is also available.

E Power Option

Available in four colors on select styles, corded power modules include 120V and USB-A+C ports.

F Cleanability

Push thru space between back and seat routes debris to the floor. Raised base provides easy access to clean beneath the chair without moving it.

G Cup Holder

Optional aluminum cup holders can be added to low arm units.

H Ganging

Optional hook and post ganging system available on low arm or armless units for side-to-side ganging only.
