

Pirouette Tables

Pirouette is a comprehensive table line that offers a variety of worksurface shapes, base styles and heights to help create cohesive and adaptive spaces.

Features

- Available in nine different top shapes to support training and learning applications.
- Select from fixed or nesting leg styles.
- Offered in collaborative or training base styles.
- Easily reconfigures and nests for simple storage and adaptability.
- Height-adjustable tables are available with set screw or pneumatic adjustable bases.
- Offered with optional corded and single circuit power with wire management.

Construction

- Standard worksurface tops are nominal 1-1/4" overall thickness with .030" thick high-pressure laminate top surface and a .028" phenolic backer (bottom surface).
- Ganging mechanism is molded black, high-strength nylon. The hook and peg combination draws tables together back-to-back or side-by-side.
- Optional modesty panel is available with PET felt. PET felt is constructed of a heat-set, non-woven PET material, pressed into a flexible, durable and dent resistant panel.
- Pneumatic or screw height-adjustable bases are 29–44" tall. Fixed height bases are available in 29, 36, and 42" heights.

Product Highlights

Nesting Redefined

Pirouette nesting tables support quick reconfiguration – the pull of a single lever flips the worksurface vertical while the innovative angled legs create straight-line nesting for compact storage. Nesting is compatible between fixed- and adjustable-height bases for added specifier freedom. Height-adjustable nesting tables can nest at any height. Flip, nest, move, reconfigure or store to accommodate the needs of any space on demand.

High Achievers

Height-adjustable tables are available with fixed or nesting worksurfaces in rectangle or chevron shapes for maximum flexibility in a sit-to-stand height range. The pneumatic height-adjustable base supports quick adjustments and changing needs. The set screw height-adjustable base is perfect for structured settings such as tiered classrooms or training rooms.

Sit Comfortably

Pirouette offers a collaborative base style that features inset legs, allowing seating with plentiful leg and storage space on all four sides of a rectangular table.

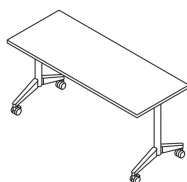

Power Integration

Pirouette tables can be specified with single circuit power, integrated above or below the surface, to support ongoing use of electronic devices during meetings, training sessions or anywhere else a charge is needed.

Styles and Materials

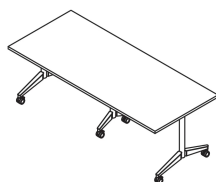

*Larger table styles may require additional support leg(s).
