Promenade® Seating

Promenade is a tandem seating system designed to provide durable, comfortable, and functional public seating with a contemporary aesthetic appeal.

Features

- Modular design and beam anchoring system offer endless configuration opportunities for both indoors and outdoors.
- Durable components can be mixed or matched for endless versatility.
- Beam construction allows for easy cleaning.
- Cushions on indoor seating can be removed for cleaning or reupholstery.
- Options include perforated steel or upholstered seats, perforated steel benches, in-line or corner tables and freestanding or anchored bases.

Construction

- Beam is a seamless 11-gauge rectangular steel 1½” wide by 2" high.
- Individual components clamp to the beam with a series of yokes and mounting plates.
- Steel leg/aluminum foot assembly can be either freestanding with glides or fixed to the floor.
- Tables are either 3/8” perforated steel or 7/8” particleboard with laminate; tables attach to the beam with a steel spider.
- Steel and aluminum parts have electrostically applied powdercoating in formulas for indoor and outdoor use.
- Seat spiders and yokes mount the seats to the beam.
- Tested to ANSI/BIFMA X5.4-1983 standards.

Product Highlights

Durability

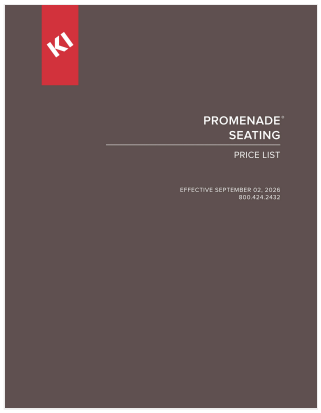

Durable components can be mixed and matched, offering limitless versatility. Promenade seating is available in perforated steel or upholstered seat and back options. Benches are available in perforated steel. Beam construction allows for easy cleaning.

Configuration Options

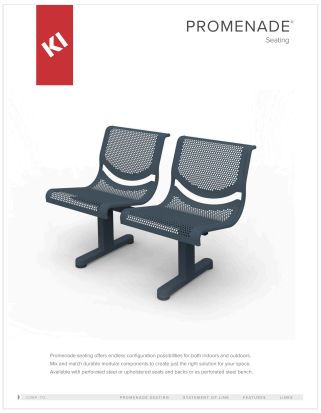

The modular design and beam anchoring system allows for unlimited configurations in both indoor and outdoor applications. In-line and corner tables are available for straight, L-shaped, or U-shaped arrangements. Available with freestanding or anchored bases.
